PROFESSIONAL SUMMARY

Analytics professional specializing in performance analytics, program evaluation, and decision support within complex, regulated systems. Brings a systems-oriented approach to data quality, metric definition, and reporting workflow design.

Translates complex operational and program data into actionable insights that support performance improvement, outcome measurement, resource allocation, and strategic decision-making.

Develops audit-ready reporting, validates data integrity, and designs clear, decision-ready analytical resources that enable stakeholders to understand performance, identify opportunities for improvement, and act with confidence.

Standardizes reporting workflows, guides cross-functional users, and improves data quality, measurement consistency, and reporting reliability at scale.

CORE SKILLS

- **Performance analytics and decision support**
- **Program evaluation and outcome measurement**
- **Data quality, validation, and audit-ready reporting**
- **Metric development, definition, and documentation**
- SQL (data extraction, transformation, and analysis for reporting; structured data validation)
- **Reporting tools and workflow design (Excel, Tableau, Access; standardized, repeatable reporting and validation workflows)**
- Data governance and quality assurance
- Cross-functional collaboration

PROFESSIONAL EXPERIENCE

Data Analyst / Consultant

Delenstarr Consulting | Fort Collins, CO (remote)

July 2026 - Present

- Provided **data analysis and program evaluation consulting** for a Colorado initiative focused on strengthening employment opportunities and workforce participation for adults age 50+
- Analyzed statewide demographic, labor force, employment, and program data to identify trends and **translate findings into actionable insights for workforce stakeholders and decision-makers**
- Helped develop an **evidence-based Longevity Report**, integrating quantitative findings, program information, and supporting research into a **clear, decision-ready resource for state and regional workforce leaders**
- Collaborated with project leadership to **refine report architecture, validate data and findings, strengthen data visualizations, and support final quality review** prior to submission to the **Colorado Department of Labor and Employment (CDLE)**

Management Information Systems (“MIS”) and Data Analyst

Larimer County Economic and Workforce Department | Fort Collins, CO

Nov 2021 – Aug 2025

- **Defined and standardized performance metrics** to evaluate workforce programs, aligning measurement frameworks with program performance, outcome measurement, and evaluation
- Analyzed large-scale program data to identify trends, anomalies, and **utilization patterns**, informing **resource allocation, program performance, cost drivers, and quality improvement initiatives**
- Developed and standardized **Excel-based reporting workflows and robust templates** used across **Colorado’s 10 workforce regions**, improving statewide reporting **accuracy, consistency, compliance, and efficiency**
- Performed **data validation, quality assurance (QA), and reconciliation** across multiple sources and reports, **resolving discrepancies** and ensuring accurate, consistent, audit-ready reporting in compliance-driven environments
- Collaborated with **cross-functional stakeholders** to define metrics, clarify reporting requirements, and **translate complex data into actionable insights** supporting program and operational decision making
- Selected for **two statewide data teams** developing ROI and program evaluation methodologies; translated **federal WIOA performance and reporting requirements** into **standardized templates and workflows** supporting compliant statewide submissions, program evaluation, and funding decisions
- Led training for state and regional teams on reporting tools, **standardized data workflows**, and metric interpretation, enabling **all 10 workforce regions** to apply **standardized reporting workflows and metric definitions**

President and Data Analyst

Delenstarr Consulting, LLC | Koloa, HI (remote)

July 2007 – July 2019

- Maintained long-term collaboration with Agilent, providing analytical support, data validation, and systems insight across scientific and operational workflows
- Led statistical analysis of complex regulated datasets, supporting **data validation, performance assessment, and regulatory reporting requirements**
- Provided **analytical evidence** that the Agilent scanner for the gene expression system met or exceeded **Chinese regulatory requirements**, supporting successful product approval
- Further developed and refined **quality control (QC) metrics** to detect anomalies, **validate system performance**, and support **regulatory compliance** within production analytics workflows
- Continued collaboration with engineering, regulatory, and product teams to test, validate, and enhance successive software releases, maintaining version control and release documentation standards
- Provided advanced third-tier analytical customer support, resolving complex data and reporting issues, while ensuring documentation accuracy and issue traceability

Bioinformatics Scientist

Hewlett-Packard/Agilent Technologies | Santa Clara, CA

Oct 1996 – June 2007

- Developed **quality control (QC) tools, performance metrics, and data thresholds** used by customers to **validate data accuracy and system performance**, strengthening confidence in analytical systems and supporting consistent, reliable outputs
- Developed **standardized reporting frameworks** for the identification and interpretation of trends, anomalies, and normalization issues, improving **data integrity** and interpretability
- Invented and applied advanced analytic algorithms for feature identification, background correction, and statistical validation within complex data systems
- Partnered with engineering and product teams to test, validate, and refine software prior to release, contributing to improved system performance and cost efficiency

Group Leader Reagent Development

Abaxis | Sunnyvale, CA

Jun 1992 – Sept 1996

- Led development of diagnostic assays in regulated laboratory environments, requiring precise measurement, validation, and quality control
- Developed **customer-facing QC tools and methods** that enabled users to **validate clinical data accuracy and system performance**
- Collaborated with biostatisticians to support **FDA 510(k) and CLIA submissions** through **data analysis, documentation, and interpretation**
- Partnered with software and engineering teams to translate laboratory measurements into algorithm-driven systems, contributing to the development of products whose success supported the acquisition of Abaxis by Zoetis

Senior Research Scientist

Microgenics | Concord, CA

May 1986 – Jan 1990

- Technical lead for first homogeneous assay of Hemoglobin-A1c (HbA1c)
- Converted HbA1c technology to include heterogenous formats
- Identified key enzymatic requirements for successful homogeneous assays and streamlined QC and production processes, including development of standard operating procedures (SOPs), reducing manufacturing costs and improving assay robustness

TECHNICAL SKILLS

- SQL (Access; expanding to Databricks SQL)
- Excel (Advanced: complex formulas, pivot tables, standardized reporting templates)
- Tableau & Tableau Prep (data visualization, transformation, and curation)
- Reporting & Workflow Design (standardized templates, metric definition)
- Data Validation & Quality Assurance (audit-ready reporting)

EDUCATION

University of California, Los Angeles (UCLA)

PhD, Molecular Biology Institute

Dissertation research under Nobel Laureate Dr. Paul D. Boyer

University of California, Irvine

Bachelor of Science

Magna Cum Laude with Research Honors

Continuing Education: Tableau; applied statistics; Johns Hopkins University—ConTESSA public-health program evaluation and decision-support application; currently expanding SQL capabilities in Azure Databricks

FELLOWSHIPS

NASA Ames Research Center

National Research Council Fellow

Stanford University

Postdoctoral National Heart Fellow, Department of Pharmacology

Patents

Co-inventor on 23 patents related to diagnostic assay development and analytical systems, including one as a sole inventor (representative patents available upon request)
